REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: None of the prior art, either alone or in combination suggest the claims as amended. As pointed out by applicant, the splicing member of Riess et al. would negate the intention of Deans et al. to create a splice that does not require an additional member. Similarly, the newly cited reference to Balamuth et al. and the reference to Vance, Jr. would not be combinable with Riess et al. to meet the instantly claimed limitations. Balamuth et al. shows vibratory welding of film strips and teaches that to be preferential to splicing tapes because splices formed by tapes can be time consuming, unreliable in strength and erratic in position (column 1, lines 31-36). Vance, Jr. also teaches that ultrasonic splicing of film strips is preferable to older methods such as taping (column 1, lines 17-23). Furthermore, none of the prior art suggests a splice formed by inductive heating with a peel strength greater than 1 kg/35mm and a tensile strength greater than 18 kg/35mm.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark A Osele whose telephone number is 571-272-1235. The examiner can normally be reached on M-F 9:30-6:00.
